

Aquifer / Watershed Review Statement

The property at 4 Hales Road is not located within the Town of Westport Aquifer Protection Overlay Zone, as shown on the official zoning map. A review of Connecticut Department of Public Health GIS mapping also confirms that the property is not within a public water supply watershed or state-designated aquifer protection area. Therefore, the notification requirements to the Connecticut Commissioner of Public Health and the local water company under CT General Statutes. § 8-3i do not apply.

It is noted that while the property lies within the service area of a community public water system, it does not serve as a source or contributor to the system's water supply.
