FROM CHAPTER 12. DEFINITIONS

Building Height or Height:

The vertical distance measured in feet from the average existing level of the ground surrounding the building or addition thereto and within ten (10) feet thereof up to the midpoint height of a pitched roof or up to the level of the highest main ridge or peak of any other type of structure, or the total number of stories in a building including basements and/or half stories for non-residential developments. In cases of buildings with more than one pitched roof and/or dormer, all pitched roofs and/or dormers must comply with allowable building height. The number of points necessary for an "average" computation shall be based on appropriate contour intervals or spot elevations as required by the Planning and Zoning Commission. The existing level shall mean the actual or proposed elevations whichever is lower of the property at the time of application.

(Also see §32-7 for satellite dishes and antennas prohibition). The provisions with respect to height shall apply to roof- top mechanical equipment but shall not apply to the following:

- Solar panels on a pitched-roofed building provided the highest point of the panels are located no higher than the roof ridge line;
- Solar panels on a flat-roofed building which do not extend more than 5-feet above the roofline of a flat-roofed building, provided that the panels are set back at least 6-feet from the edge of the roof on all elevations;
- Roof parapets and turrets 3 feet or less in height;
- Roof guards, as defined in the Building Code, and rooftop railings not to exceed the minimum height in the Building Code; provided that such railings or roof guards are not solid or opaque;
- Cupolas and domes not used for human habitation, clock towers, bell towers and roof ventilators; provided that
 - The cumulative square foot area of these structures cannot exceed 5% of the footprint of the roof area of the building on which it is located, or 100 square feet, whichever is less; and
 - The structure shall fit within a 10' x 10' square; and
 - The structure shall not extend more than 5 feet above the ridge of the roof or top of flat roof on which it is located.
- Church spires and belfries, pole type TV antennas and chimneys.
